Dr. Logan Schneider is the Clinical Lead for Sleep Health at Alphabet (Google), Consultant Neurologist at the Stanford/VA Alzheimer's Research Center, and Clinical Assistant Professor (affiliated) of Sleep Medicine at the Stanford Sleep Center. Following postdoctoral training in sleep, genetics, and big data with Dr. Emmanuel Mignot, Dr. Schneider advised multiple startups: a mental health technology company, Medibio; an infant, sleep-aid device by Hatch (subsequently funded by Amazon); and a computer-vision, sleep-monitoring system that was acquired by Alphabet. His scientific and clinical expertise supported cross-functional teams at Alphabet in successfully launching the sleep coaching experience on the Nest Hub 2nd generation with Sleep Sensing and the recent Fitbit sleep experience update that includes a monthly sleep analysis and 6 Sleep Profiles. Dr. Schneider has also dedicated his time to democratizing sleep health and awareness through his committee leadership within the American Academy of Neurology and American Academy of Sleep Medicine. He is board certified by the American Board of Psychiatry and Neurology, Sleep Medicine, and American Board of Psychiatry and Neurology.

He received his medical degree from University of Florida College of Medicine, completed his residency at The Johns Hopkins University School of Medicine and his fellowship at Stanford University.
